What's New in CAM32

CAM Commerce is committed to providing the best software for your retailing needs. Software updates contain enhancements, new features, and fixes that will help your retail operation run more smoothly. Some areas addressed in our current release:

Paid Out Reason Codes – NEW!

- Define custom Reason Codes that must be selected for each Paid Out
- Define dollar limits at which an un-intrusive prompt will display to do a "Safe Drop" Paid Out
- See "Safe Drops" broken out separately on POS X/Z Reports
- All Paid Out reason codes reported on Transaction Register (EOD) report.

Selling Below Cost Warning – NEW!

- You can flag certain Departments to display a warning prompt at POS when an item from that department is being sold at a price lower than item cost.

Price Change Utility Enhancements

- Support for up to 500 Normal and 500 Promotional Price Change Files
- Ability to copy existing file into new
- Added "Proposed Cost" field back onto report

POS Item Inquiry

- Added Class/Subclass to screen
- Added Print button from multistore BOH window to print store information and item availability.

Contract Pricing

- Increased maximum number of items on 1 contract from 7,500 to 32,767.

Sales Log Viewer reporting

- Class/Subclass fields added

iCAM32 webstore

- "Compare At" pricing

Pharmacy

- Controlled Substance Tracking
- Manual RX Override (for Pharmacy Interfaces)

New Hardware

- Compatible with the HHP TT8500 (electronic signature capture device)

Current Software Versions

Current General Release Software:

CAM32 4.03.0
X-Charge 6.2.0

To obtain CAM32 Upgrades, login to the CAM32 Communities at www.camcommerce.com and click the link at the top of the webboard to submit a CD request. Or, call Support to request the CD.

To obtain X-Charge Upgrades, open your X-Charge Server program and go to Help > Check for Updates (Internet Connection required). Or call Support to request a CD.

In Development

CAM32 4.04 series is currently in the Beta testing phase. Here's a sneak-peek at what's to come:

Support for the Symbol MC3000 (PDT)

- Unit runs the Microsoft Windows CE operating system
- Ability to upload inventory to the unit for "realtime" validation during Physical Inventories
- Ability to add NEW items on the unit, which can be added to the CAM32 database upon download

User Forum

Support customers are entitled to login to the CAM32 Communities at www.camcommerce.com. Here you can post questions and ideas with other CAM32 users and find out how others use the system. In addition, you can stay up-to-date on software updates and fill out a software request form for the latest version.
