October, 2009

FINAL NOTICE: Update Required for ALL X-Charge Merchants!!!

Failure to upgrade WILL prevent you from processing any credit or debit cards. To ensure uninterrupted credit and debit card processing, **YOU MUST upgrade your current X-Charge software TODAY.** In most cases, you can upgrade your software simply by opening the X-Charge program, then Clicking on Help, and selecting "Check for update...". Follow the prompts to complete the upgrade. You can also visit www.x-charge.com/upgrade or call (866) 442-1901 to complete this Mandatory upgrade TODAY! Thank You for processing with X-charge!

Introducing CAM32 v6.07

We are pleased to announce the release of CAM32 version 6.07 has arrived! This upgrade contains many new features, enhancements, and fixes.

Here are some features in 6.07:

PCI Compliant for Credit Cards

Introducing Xpress Link, the solution for processing Credit Card transactions through X-Charge, making CAM32 fully PCI Compliant!

IIAS Compliant for FSA

Flexible Spending Account cards for pharmacy are handled through Point of Sale and a SIGIS importer has been added for updating CAM32 Inventory Items as Eligible/FSA Item's to keep your system up to date.

Dual-Purpose Items for Pharmacy

With changes in laws today, doctors may write prescriptions for over-the-counter items that can be charged with a flexible spending account card. CAM32 is able to account for these through inventory.

Home Deliveries for Pharmacy

The ability to do home deliveries has been added for Pharmacy. A computer with a wireless Internet connection is needed to make a sale on the road.

Deleting Multiple Line Items

In Purchasing and Receiving, the ability to delete multiple line items from Purchase Orders is now possible.

Label Printing Enhancements

LabelView and NiceLabel have been changed to handle printing up to 20-character scan codes.

Support for Ingenico Devices

Added Support for Ingenico Pin Pad and Signature Capture Devices (Models: i3070, i6550, i6780).

Creating a PDF

PDF (Portable Document Format) is allowed as a printer to be selected through CAM32 when your system has a program installed that will create PDF's

A complete list of changes can be found in the version Release Notes, while a condensed list of highlights can be found in the version Release Highlights. Both documents are available right on the 6.07 CD.

Upgrading to v6.07

Due to the important changes with this upgrade, it is imperative that you thoroughly read and follow the *CAM32 Service Pack Live Update Procedures* prior to conducting your upgrade. Some highlights from the procedures include:

- ✓ Upgrade X-Charge to v7.0.2+.
- ✓ Install X-charge as a "Client Install" on all registers that will process credit cards through POS.
- ✓ Define X-Charge settings, (Create username and password, etc.)
- ✓ Enable FSA Transactions through X-charge server setup. Then run BIN Update (For Pharmacies)
- ✓ Run The CAM32 6.07 upgrade
- ✓ Restart your computer (Required)
- ✓ Define Bankcard Authorization as Xpress Link and define the Username/Password (to match X-Charge)

Contact Technical Support at (800) 949-1470 option 7, with any questions prior to conducting your upgrade.
