

New Accounting Features In Retail STAR 9.5

Print Checks from the Bill Screen in Accounts

Payable – Write your checks straight from the Bill screen without having to exit and print from the Payment or AP Select screens. Display check number, amount and invoice number from Payment button search screen.

Accounts Receivable Balance Adjustment -

Adjust customer balances without having to create an invoice or do a return. Display customer invoices and unapplied payments from the same screen for easy reference. Debit and Credit memo documents are saved and can be viewed and printed at any time.

Reprint Daily Process Reports – In the past, if your daily process reports didn't print due to a printer malfunction, there was no way to reprint these reports and information could only be gathered through alternative reports. Now, all daily process reports can be reprinted or you can select which reports you want to print without printing all of them.

iStar Option Available in Sales Order – In versions prior to 9.5, in order to do a manual iStar order, you had to check the iStar box which was only available in Invoice. The iStar box is now available from the Sales Order window.

Print Order Notes – Customers interested in printing the notes from the memo tab in Sales Order and Invoicing will be happy to note that this feature is now available on 9.5+. And you have the option to print the notes on all order forms, such as sales orders, invoices, or pick tickets.

Ability to See Only Open Sales Orders – The option to see only open sales orders in the sales order window is available. This will clean up the sales order screen and make it much easier to work with sales orders still needing to be filled and converted to invoices.

Tag Printing Software

As of version 9.5+, CODESOFT will no longer work for external tag printing and is being replaced with NiceLabel. Some of the features of NiceLabel with version 9.5+ are:

- The ability to customize your label using a graphical interface
- The ability to print barcodes on jewelry labels
- Allows you to place any text you want on a tag, including store name and address info
- Have different saved tag designs for one size tag
- Place as many fields on a tag as you can fit
- Change the sort order of your tags so they print in the order of your choosing

If you are interested in NiceLabel or have questions about label options, please call your salesperson at 866-840-4443.

Signature Capture Compliancy Reminder!

July 1st, 2010

Please be aware that the deadline for replacing the non-compliant Signature Capture devices is approaching!

The devices that must be replaced are:

HHP-TT3101
HHP-TT8810
HHP-TT8500

If you own any of these devices, they must be replaced by July 1st, 2010! Failure to replace these devices could create a substantial liability issue for your company. For information on devices that have been approved for compliant use, please call your salesperson at 866-840-4443.
