## Tag, You're It!

One of Retail STAR's many powerful functions is its Tag Printing capability. You can print barcode tags directly from the Tag Printing option (found on the Purchasing menu in STAR Office), or you can print tags directly from Inventory, Purchasing, Receiving...in fact anywhere that a 'Tags' button appears!

Also, you have the option of using Retail STAR's own internal tag printing application, or you can use 'Nicelabel'; an external application for printing tags that are highly customizable.

The internal tag printing option allows you to print a selection of 'default' tags on various sizes and styles of label. You can use sheets of laser labels (sized 1"x 1 1/2" and 2 5/8" x 1"), hanging tags (2 1/4" x 1 1/3"), or jewelry tags (2 1/4" x 1/2"). The 'default' tag formats include Basic, Basic with Title, Size Detail, and Size Detail with Title.

The option to print to Nicelabel, an external tag printing application, allows you to design and print your own tags. You can change fonts, add more fields, use your own company logo and design etc. You can then save your customized tags as templates, then whenever you are printing tags, you can select the appropriate template to use.

Many tags require a special barcode printer, and even though there are many different types on the market, CAM have taken the guesswork out of which printer to use by developing our own barcode printer to compliment Retail STAR; the CAM Z100 Stryper. It can connect to your computer using either a USB cable or a Parallel cable, and will print on label stock that we also provide. This means you can get everything you need to print tags from CAM.

If you are interested in using Nicelabel to design your tag templates or the CAM Z100 Stryper for printing them, contact your CAM Sales Representative for more information.

And don't forget that our team of Support Technicians are available to assist you with this or any other question; just call 1-800-949-1470, and selection option 6 on the menu to speak with a technician.

## Here A Tag, There a Tag

*Where You Can Find A 'Tag' Button*

Whenever you see a 'Tag' button displayed on the toolbar, you can print tags directly from that screen:

- In Product Maintenance, to print tags for a specific style.
- In Price Changes for tagging products with a new price.
- In PO Maintenance or Receiving, for items on order.
- In POS for products that have been returned.

For more information on how to print tags from these areas of the software, check out 'Appendix A' in the Retail STAR User Reference Manual.

### Retail STAR 7.5.126

Our current 'General Release' version of Retail STAR is 7.5.126 Service Pack 2. If you are on an older version of Retail STAR and would like to upgrade, please contact Technical Support on 1-800-949-1470, selection option 6 from the menu, and a Technician will be able to assist.
